

# *Where Should We Play Ball?*

**The maps displayed show areas where rectangular fields can easily be located for recreational sports such as soccer, football and field hockey. Any areas shown in green or purple could accommodate fields. The County would like input on the location of these fields, as well as the locations of entrances to the property.**

Do you agree with the location, size and number shown for rectangular fields?

---

It would take about 20 acres to provide 6 fields and parking. If you do not agree with the location shown for the rectangular fields, please indicate your choice of an alternative location (for example, in the center of the property, near Courthouse Road, etc.). Any area shown in green or purple can easily accommodate fields.

---

Do you agree with the locations shown for access roads to the property (from Scott Park and Courthouse Road)?

---

Would you be in favor of having access to the property, either by a pedestrian walkway or a public road, from the adjoining neighborhoods (Branchester Lakes and Rolling Meadows)?

---

What are your thoughts concerning location and number of baseball and softball fields?

---

---

*The Prince George Board of Supervisors appreciates your input and looks forward to working with our community to plan our recreational needs for the years to come. If you would like someone to contact you about any specific questions you may have or if you need additional information, please provide your name and a daytime telephone number and we will be happy to assist you.*
